

## TROVA H2 | Multifunctional low power tracker

**The H2 is our best selling product because it can be used for a number of applications. Vehicle & Asset tracking (fixed) Personal and guard tracking (portable) Once the unit stops detecting movement it goes back into sleep mode which would allow the battery to last for 6 months in this state. The Trova H2 comes with a built-in SIM chip which cannot be removed and used elsewhere, eliminating the element of tampering or theft. In cases where there is a need to be tamper and waterproof, the H2 is epoxied in an RTV silicon which will allow the unit to be completely sealed and waterproof. This is greatly used in guarding. The rugged 5mm DC-jack charging port allows the H2 to be plugged in easily and charged. The H2 has a built-in short range transmitter and receiver which have great uses such as communicating from sensors or remote controls to controlling and opening gates remotely.**
