

Trova A6 | Cost effective tracker for vehicles

The Trova A6 is an all in one DIY GPS tracker that is easy to use and quick to install. The tracker uses GPRS, GSM & GPS technology to pin point the exact location of your vehicle. Although it's connected to power the device has it's own stand-alone battery which enables tracking even once the ignition has been turned off. If the vehicle is dormant for some time the battery will then enter a low voltage mode in order save power and guarantee tracking at all times. Should the battery run low the device will report it's battery status as well as display whether the vehicle is turned off or on. To add to this amazing functionality, the Trova A6 enables you to trigger a fuel cut but simply sending an SMS. This implies the power steering and ABS of the vehicle will still be fully functional but the vehicle can no longer drive. Moreover, the Trova A6 has a vibration sensor that can detect a collision and may be configured with a panic button that will send an sms to a selected mobile number once pressed. This device is water and dust proof to ensure it can withstand the environmental conditions of day to day driving.

TROVA
Track Anything

FEATURES:

- GSM FREQUENCY: 850/900/1800/1900 MHZ
- GPRS: CLASS 12,TCP/IP
- MEMORY: 64MB
- GPS FREQUENCY: L1,1575.42MHZ C/A CODE
- CHANNELS: 66
- LOCATION ACCURACY: <10 METERS
- LED LIGHT INDICATOR: GPS(BLUE), GSM(GREEN), POWER(RED)
- DUST/WATER PROOF LEVEL: IP65
- BATTERY: 450MAH/3.7V INDUSTRIAL-GRADE LITHIUM-POLYMER BATTERY
- VOLTAGE/CURRENT: 9-90VDC/7MA (60VDC)
- DIMENSIONS: 87.0(L) X 74.0(W)X 18.7(H)MM
- OPERATOING TEMP: -20 DEGREES TO +70 DEGREES
- STAND-BY TIME: 72 HOURS STAND BY WITH BATTERY, CONTINUOUS TRACKING 6 HOURS
