

## TX Link I Universal transmitter

**The TX Link is a general purpose transmitter which can be used to interface any device to a radio receiver.**

### FEATURES:

- Programmable trigger times and inhibition time for ultimate power saving
- Programmable check-in time
- External input
- 403 & 433Mhz versions available
- Battery low detection, indication and transmission
- 6-12V input range

## Advisor I Universal Receiver

**The advisor is a cost effective receiver with a multitude of built-in functions for various applications. The relay, open collector output, buzzer and two LED's can be programmed to perform different functions based on the channel code sent by the transmitting device.**

### FEATURES:

- Mimics all alarm conditions of the Homeguard portable alarm panel
- Used in conjunction with the M.A.M.I Reactor Tracker, has the facility of a control room operator giving guards access to a premises, remotely
- The advisor is also used in the application of a nurse calling system such as hospital or old age home. When used in this scenario, advisors are installed above each room door and will illuminate and trigger the buzzer in various ways to inform nurses which room is calling or the alarm situation, medical, panic, fire, etc.
