

All-In-One (AIO) | Gsm communicater

The M.A.M.I. GSM AIO gives you the ability to control 4 relay outputs and monitor four positive triggered inputs. When one of the inputs are triggered an SMS is sent to the mobile numbers assigned to the input. The missed call functionality may be used to pulse one of the relays should a programmed number phone the unit. This means there is no charge in activating the relay making it very useful for access control. Multiple activation commands may be sent in a single SMS. These commands include ON, OFF or pulse. The AIO also has schedules that may be used to activate and deactivate the relays at the user's discretion. All inputs and input states may be customized to make the SMS messages easy to understand.

- 4 X 3A 12V NORMALLY OPEN OR NORMALLY CLOSED RELAY OUTPUTS
- POWER SUPPLY: NOMINAL 12V DC
- 4 X LIGHTNING / SURGE PROTECTED INPUTS
- POSITIVE INPUT TRIGGERS
- SUPPORTS ANY NETWORK
- PROGRAMMING VIA PC USING USB CABLE OR VIA SMS
- ALARM (HIGH) AND RESTORE (LOW) CONDITIONS ON ALL INPUTS
- PRE-PAID FACILITY TO ALLOW THE ADDITION AND RETRIEVAL OF AIRTIME
