

6 CHANNEL SIGMO | Radio communicater

6 Channel Sigo Radio.M.A.M.I. Sigo radio radio transmitters are mainly used for alarm panel monitoring. They are cable of sending signals over the sigfox network.

The signal is typically received on a base station located in a control room connected to alarm monitoring software. The MAMI Sigo radio is a communicator for any alarm panel. It interprets the signal sent on the Sigfox network by the alarm panel. It converts it to a readable SMS and sends the SMS to the required mobile number(s). This allows you to know the status of the panel or the reason for an alarm from anywhere via the 6 Channel Sigo Radio

Applications include:

Transmission of alarms

(e.g. burglar, fire, house, fence, sub stations, mining, etc)

- 6 CHANNEL
- CONNECTC TO ANY ALARM PANEL
- USES SIGFOX NETWORK
- POSITIVE INPUT TRIGGERS
