SAFENODE | Wireless Alarm & Panic System

The Safenode is a 64 zone wireless alarm panel.
It comes with an built-in PIR and emergency buttons allowing for easy activation in the case of an emgergency situation.
The remote control provided, allows also for various functions, arm, disarm, panic, stay arm/silent panic.
The internal 1800mah battery allows for a 48hour opration should there be no power.
Two models are avaiable Sigfox or GPRS.
The safenode is directly compatible with all MAMI wireless sensors including, PIR, door contact, panic buttons.
Any existing non-MAMI wired or wireless detector can be converted to wireless using MAMI Txlink and operate to the SafeNode.
**Additionally the Safenode is directly compatible with RoboGuard without the need of any conversion or hardware.**
All emergency and informative information such as, mains status, arm, disarm etc is communicated to the MAMI cloud platform.
From the cloud platform these signal may be sent directly to our Mobile Misson mobile application as well as to a control room for monitoring.
The Safenode is mounted with 2 wall plugs, making it really quick and easy.
