

GSM INTERCOM I500 | 4 OR 400 USER GSM INTERCOM

Typically mounted at the entrance of complexes, flats or outside your house. The GSM Intercom gives you the ability to answer the intercom and open your gate from anywhere in the world. No wire is needed as with conventional intercom installations.

Features

- SIM card is housed in lockable metal enclosure inside the premises
- Missed call feature to open gate (no operational costs)
- Can open gate from keypad or cellphone while on a phone call
- Automatic hangup
- Up to 400 telephone/cellphone numbers
- Alternative 4 button version available
- Pre-paid operation, retrieve and add airtime via SMS
- Programmable via USB (computer) or SMS (remotely)
- Robust BPT rubberized splash proof keypad design
- Auto-answer on call
- May be used with a handset in guardhouse applications
- Two gate stations may be used on a single controller (eg. entry and exit)

GATE STATIONS | 4 OR 400 USER

Up to 4 numbers may be dialed by pressing the corresponding call button. Up to 400 numbers may be added for missed-call gate-opening function. The 4 button and 400 button user keypad units can be used on the same system.
