

TROVA T1 | VERSATILE & MULTIFUNCTIONAL MINI TRACKER

The Trova T1 is 4G, GNSS portable tracker allowing for two-way voice communication. The robust IP rated casing is IP54 rate and is easily charged the magnet charger port. The T1 has extensive mode settings to cater for every application to get maximum battery life.

In addition to GNSS location outdoors, the T1 has built in wifi and Bluetooth allowing for smart location indoors. The Wifi/BLE also enables smart modes so that battery is not consumed by GPS and 4G when the device is in a smart zone.

An additional button on the side has a custom function that can be used for various situations, such as marking of point of interest.

The device is fully programmable by SMS or platform commands.

Magnetic contact point for easy charging

KEY FEATURES
