

TROVA QBIT M | LTE PORTABLE GNSS TRACKER

The Trova Qbit M is a cutting-edge portable tracker meticulously crafted to safeguard the personal security of the elderly, children, and vulnerable individuals. Boasting a compact structure and small form factor, this device ensures discreet yet powerful personal security.

Equipped with LTE-M communication and GNSS positioning technology, it establishes a robust connection and delivers highly accurate positioning across diverse environments. In addition, the Qbit M offers a range of invaluable features including intelligent positioning for comprehensive indoor and outdoor coverage.

It allows for customizable working and sleeping hours, optimizing its functionality to your specific needs. Despite its compact size, the Qbit M boasts an impressive standby time, ensuring it remains ready whenever you are. The inclusion of a panic button provides immediate access to emergency assistance, transmitting real-time location data.

For added security, a sound alarm feature can be activated via the app command, aiding in the swift location of the device, asset or person. With the safety fence feature, geofencing is made easy, enabling notifications if the device strays from a designated area, further bolstering peace-of-mind.
