

TROVA S1 | SIGFOX PANIC BUTTON

Our S1 Sigfox Panic Button is a compact, standalone emergency device designed for instant communication in critical situations. With just a single press, it sends an immediate alert to the Mission Control mobile app, ensuring rapid response and enhanced personal safety. Powered by Sigfox's reliable low-power network, it operates without the need for complicated installations or constant maintenance, making it an ideal solution for individuals, remote workers, and vulnerable personnel. This simple yet powerful tool provides peace of mind by ensuring help is only a button press away.
