

### PB705 | ASSET TRACKER

The PB705 Mini Asset Tag is a compact Bluetooth Low Energy (BLE) tracking device designed to help monitor and recover valuable assets without requiring a SIM card or cellular network. Using a crowdsourced Bluetooth network, it provides worldwide location updates when detected by nearby compatible smartphones, making it ideal for discreet asset protection and personal tracking applications.

- Bluetooth Low Energy (BLE) asset tracking
- No SIM card or monthly cellular subscription required
- Worldwide location tracking through a crowdsourced network
- Battery life of up to 36 months (usage dependent)
- Compact design (42.5 mm × 24 mm) for hidden installation
- IP68-rated water and dust resistance
- Integrated 80 dB audible alarm for locating nearby items
- Geo-fence alerts and movement notifications
- Flexible mounting using 3M adhesive or magnetic holder
- Replaceable CR14250 800 mAh battery
- Compatible with iOS and Android mobile applications
- Secure and anonymous location reporting for enhanced privacy
