

TROVACAM 6 | DASHCAM

The Trovacam 6 is an advanced 4G-connected fleet camera solution designed to improve driver safety, vehicle security, and fleet visibility. Supporting up to three Full HD 1080P cameras, the Trovacam 6 provides comprehensive coverage of the road, driver, and vehicle surroundings while delivering real-time video monitoring and GPS tracking. Equipped with intelligent AI technology, the Trovacam 6 offers Advanced Driver Assistance Systems (ADAS) and Driver Monitoring System (DMS) capabilities that help detect distracted driving, fatigue, lane departures, unsafe following distances, and potential collision risks. Instant alerts help improve driver behavior and reduce accidents. The built-in 4G LTE connectivity enables live video streaming, cloud-based event uploads, remote fleet management, and real-time GPS location tracking. With onboard storage and support for additional memory, critical footage is securely recorded and easily accessible when needed. Designed for commercial fleets, logistics vehicles, taxis, buses, and high-value asset transport, the Trovacam 6 combines video telematics, AI safety features, and GPS tracking into a compact and powerful solution.

BLIND SPOT CAMERA

- Triple-channel Full HD 1080P recording
- Built-in 4G LTE connectivity
- Live video monitoring and playback
- GPS and BeiDou positioning
- ADAS safety alerts
- Driver Monitoring System (DMS) support
- Cloud video uploads and storage
- SOS emergency button support
- Wi-Fi and Bluetooth connectivity
- Built-in 128GB storage with expandable memory support
- Remote fleet management and tracking
- Suitable for trucks, fleets, taxis, buses, and commercial vehicles
